

Drive safe this Winter

With the cold winter months upon us, more care than ever is needed on our roads. Just a few minutes of your time will greatly enhance your personal safety and that of your vehicle. It's a difference you'll see immediately.

Ensure your driving safety with these 7 simple steps:

- 1 Improve your visibility to see and be seen from dawn to dusk, during mist, fog road spray, rain, heavy cloud cover and when overcast by using permanent daytime dipped headlights.
- 2 Ensure all bulbs and lights are working, properly adjusted and regularly checked.
- 3 Clean all vehicle glass, inside and out – it makes an amazing difference to your visibility.
- 4 Clean all lamp, lens and reflector glasses.
- 5 Clean all mirror glasses.
- 6 Check your wiper blades and replace them if required.
- 7 Use cleaning fluid in washer bottle and ensure screen jets are clear and aimed properly.

Together with the SIMI and RSA Winter message of "Switch Over to Daytime Dips", you won't meet your fellow road user – by accident.
